

NOTES FOR EXERCISES IN SESSION 13

- exam2018f:1-3 (exams from previous years)

Today's session:

- home assignment IV returned, and marks from home assignments prior to final exam totalled — to which you need to add your quiz score,
- exam logistics — your questions on lecture 13,
- do we include a brief review/discussion? (\approx 2.15pm) of (e.g.): exam 2018f:1,3, maybe also 7:38,39 from quiz,
- any requests for review topics or questions?

Notes and questions for specific exercises:

- all questions and solutions accessible from course homepage (solutions at the homepage for corresp. year) — some of them have already been listed for lab sessions,
- previous years' midterm exams can also be useful (roughly \sim Sessions 1–7, 12 from this year),
- previous years' home assignments can also be useful:
I \sim descr. stats, II \sim t -tests, III \sim two-way tables.
