

## LAB SESSION 13

### Outline of lab session:

- exam logistics — your questions (if any) on lecture 13,
- any review of topics/slides — upon request,
- review of exam problems at 2:30pm, suggested:  
exam 2015:3, exam 2018f:3,
- individual work on exam problems:  
exam 2015:1,3; exam 2018f:1-3 (all old exams)

### Last scheduling items:

- I need to have your midterm decision (keep or drop) by Wednesday, in writing (e.g. e-mail),
- if there is interest, we can have a lab review session tomorrow (usual time, 1-2pm).

### Notes and suggestions for exam preparation:

- all exam questions and solutions (2014→) accessible at course website (from homepages of corresp. years),
- previous years' midterm exams can also be useful (roughly ~ Sessions 1–7, 12 from this year),
- previous years' home assignments can also be useful:  
I ~ descr. stats, II ~  $t$ -tests, III ~ two-way tables,
- the quizzes (at Moodle site) can be useful as quick recaps for specific areas.
