

LAB SESSION 13

Outline of lab session:

- home assignment IV returned (with some time for individual discussion), and marks from home assignments prior to final exam totalled,
- exam logistics — your questions (if any) on lecture 13,
- any review of topics/slides — upon request,
- review of exam problems at 2:30pm: e.g., exam 2018f:2,3,
- individual work on exam problems:
exam 2015:1; exam 2018f:1-3 (all old exams)

Last scheduling items:

- I need to have your midterm decision (keep or drop) by Thursday at noon, in writing (e.g. e-mail).

Notes and suggestions for exam preparation:

- all exam questions and solutions (2015→) accessible at course website (from homepages of corresp. years),
- previous years' midterm exams can also be useful (roughly ~ Sessions 1–7, 12 from this year),
- previous years' home assignments can also be useful:
I ~ descr. stats, II ~ t -tests, III ~ two-way tables,
- the quizzes (at Moodle site) can be useful as quick recaps for specific areas.
