

PRACTICAL/LAB SESSION 4

- possible review of lecture material,
- upon request: questions (and answers) on lecture material (linear and logistic regression),
- review of VER model-building exercise (# 15),
- discussion of Logistic Regression Exercise (VER 16.1), possibly with Stata demonstration,
- work on further exercises from VER: 16.2 and 16.3,
- perhaps also work on extra “Exercises from Session 4: Logistic regression”,
 - # 3: logistic two-factor design,
 - # 1: logistic regression with single quantitative predictor, comparing Minitab and Stata outputs.

Solution files: at VHM 802, Exercises and Datasets page.
