

NOTES FOR EXERCISES IN SESSION 11

- * VER:20; VER:22 (add10:2,3,6) — VHM 802 problems (two from 9P, one new) as extras.

Schedule today:

- individual work on VER problems, to be (briefly) reviewed in tomorrow's VHM 812 class (1-4pm) — maybe go quickly through non-mixed model questions. . . .
- project proposals returned (with comments/discussion).

Other news/info:

- 2nd/4th home assignment for VHM 802 due today,
- notes on the software:
 - * see overview for VHM 802 lab session 9 (9P),
 - * solution files posted for all problems.

What you should be able to do after today's session. . .

- recognise hierarchical data structures in observational and experimental designs,
- analyse simple random effects models, for continuous and binary outcomes.
