

PRACTICAL/LAB SESSION 4

- (maybe) discussion of linear regression diagnostics exercise (VER 14.3), individually with instructors,
- further work on model-building exercise (VER 15.6-11),
- work on first logistic regression exercise (VER 16.1),
- (maybe) work on extra model building exercise (Exercise 2.7 for Session 2),
- (maybe) work on extra “Additional exercises for Session 4: Logistic regression”,
 - # 2: grouped binary data for dose-response relation similar to example in lecture,
 - # 3: logistic two-factor design,
- any questions on linear and logistic regression models (conceptual and/or practical),
- (maybe) review/demonstration for selected questions from exercises at 15:30.
