

PRACTICAL/LAB SESSION 2

- possible review of Stata commands and concepts from all sessions 1a–2a (based on questions from students),
- possible discussion of Linear Regression Exercise (VER 14) # 2 and Stata demonstration (based on student requests),
- work on Linear Regression Exercise (VER 14) # 3,
- work on selected exercises from “Exercises for Session 2: Linear and multiple linear regression”,
 - * # 5: Box-Cox transformation in a linear model,
 - * # 8: multiple linear regression: fitting and evaluating a model, and comparing models (solution also has more advanced material),
 - * extras: # 7 (also multiple linear regression) and # 1,2 (from session 1–R).

Solution files: at VHM 802, Exercises and Datasets page.
