

LAB SESSION 5

Outline of lab session:

- short session — only scheduled for 1.5 hours (room is booked from 3:30pm),
- (tentative time: 2:00pm) class discussion/review of (parts of) VER:16.3,
- individual work on the exercises:
VER:16.3 (add4:3, 1),
- use Stata or Minitab, or both, as you prefer,
 - * in Stata, utilize solution do-file or do-file from Lecture 5aL,
- also time for individual discussion.

Notes for specific exercises:

- extra “Additional Exercises for Session 4: Logistic regression”,
 - # 3: logistic two-factor design; two data formats (grouped, ungrouped with frequencies), see solution files.
 - # 1: logistic regression with single quantitative predictor; could compare Minitab and Stata features (especially Minitab’s Binary Fitted Line Plot menu might be of interest).
